Replacement Trees Planted on Route 29 Business

The Route 29 Business Beautification Committee, in Partnership with Amherst County Public Works and Community Development, replaced 17 trees on Route 29 Business. In total, two sugar maples were replanted in the grass area near the John Lynch Bridge, 12 red maples were replanted near the ramps of Route 210, and Route 163 and two Yoshino Cherry trees were replanted on the north side of the Route 210 ramp.

Amherst County Public Works handled the transportation of the trees and provided four staff members to help with the planting. Community Development staff members contacted multiple local businesses to track down the trees and assisted with the replanting process.

Thank you, members, of the Route 29 Business Beautification Committee, for sticking with this project and seeing that it is successful! As with most things, it was a significant team effort, and the Board of Supervisors would like to thank all who helped.
